# MANOJ G

Software Developer | MERN Stack | MEAN Stack | Next.js | AWS | SQL

manojfullstackdev255@gmail.com +918248953442 Chennai, Tamil Nadu, India

## OBJECTIVE

Software Developer with **4+ years of experience** building and maintaining web applications using **React.js, Angular, Next.js, Node.js, Express.js, and MongoDB**. Experienced in developing user-friendly interfaces, designing RESTful services, implementing secure authentication, and managing application data. Skilled in **JavaScript, TypeScript, PostgreSQL**, and cloud deployment using **AWS EC2 and Amazon S3**. Contributed to enterprise platforms across **trading, financial management, and employer compliance**, with a focus on application reliability, maintainable code, and efficient business workflows. Comfortable working across the development lifecycle, from requirement analysis and implementation to testing, deployment, and production support.

## SKILLS

**Frontend Development:**
React.js, Angular, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap

**Backend & API Development:**
Node.js, Express.js, RESTful APIs, Middleware, Server-Side Development

**Database Technologies:**
MongoDB, PostgreSQL, SQL, Database Design, Query Writing, Data Modeling

**Cloud & Deployment:**
AWS EC2, Amazon S3, Linux Server Configuration, Security Groups, Application Hosting, File Storage

**Full Stack Technologies:**
MERN Stack, MEAN Stack, Client-Server Architecture

**AI-Assisted Development Tools:**
ChatGPT, GitHub Copilot, Cursor AI, Claude AI, Gemini

**Tools & Platforms:**
Git, GitHub, Postman, Visual Studio Code, IntelliJ IDEA

**Development Practices:**
Agile Methodology, API Integration, Debugging, Code Review, Performance Optimization

## EMPLOYMENT

**Software Developer,** *BritApp Systems Private Limited* 08/2022 – Present | Chennai

- Contributed to the development and maintenance of **Tradeseel, Moneyseel, and ESMACS**, handling frontend interfaces, backend services, database operations, and cloud deployment across **MERN, MEAN, and Next.js applications**. Worked on business-specific features, secure user access, third-party integrations, API testing, and production issue resolution while collaborating with the development team to deliver reliable software solutions.

## PROJECTS HANDLED

**Project 1: Tradeseel – Trading and Business Management Platform**
**Technology Stack:** Next.js, React.js, Node.js, Express.js, MongoDB, TypeScript, Tailwind CSS, AWS EC2, Amazon S3

Tradeseel is a **trading and business management platform** designed to streamline product information, customer records, order processing, and transaction-related activities. The application provides a centralized workspace for managing business operations through interactive dashboards and structured workflows. Its architecture combines **Next.js-based interfaces**, backend services, and cloud infrastructure to support efficient data handling and application scalability.

**Key Responsibilities:**

- Built interactive business dashboards and reusable UI components using **Next.js and React.js**, improving navigation and accessibility across application modules.
- Developed server-side functionalities for **product management, customer records, order processing**, and transaction-related workflows.
- Designed **MongoDB collections and queries** to support business data storage, retrieval, and updates.
- Implemented search, filtering, pagination, and form validation for data-intensive management screens.
- Integrated frontend pages with **Express.js APIs**, handling asynchronous requests, loading states, and error responses.
- Configured application hosting on **AWS EC2** and managed business documents and uploaded files through **Amazon S3**.

**Project 2: Moneyseel – Expense Tracking and Financial Management System**

**Project Overview:**

Moneyseel is a **financial management application** that helps users organize income, expenses, and transaction records in one place. The platform provides expense categorization, transaction history, and financial summaries to improve visibility into personal financial activities. It focuses on secure account access, accurate record management, and a simple user experience for tracking financial information.

**Key Responsibilities:**

- Developed financial management screens for **income entry, expense tracking, transaction history**, and category-based expense organization.
- Implemented backend operations for creating, updating, retrieving, and deleting financial records.
- Built summary views to display transaction totals, spending categories, and financial activity.
- Implemented **JWT-based authentication** to protect user accounts and restrict access to financial information.

**Project 3: ESMACS – Employer Sponsor Management and Compliance System**

**Project Overview:**

ESMACS is an **enterprise employer sponsorship and compliance management system** developed to organize employer information, employee records, sponsorship activities, and administrative processes. The application supports multiple user roles and provides structured workflows for managing compliance-related information. It uses a **MEAN Stack architecture** to connect administrative interfaces with backend services and centralized data management.

**Key Responsibilities:**

- Developed Angular-based interfaces for **employer profiles, employee information**, and administrative management modules.
- Created dynamic forms with **Reactive Forms**, including field validation and conditional input handling.
- Developed **role-based permissions** to control access to administrative and user-specific functionalities.
- Used **Angular Services and RxJS** to manage API communication and share data between components.

## EDUCATION

**Bachelor of Science (Honours),** *Tamil Nadu Agricultural University* 2018 – 2022 | Tamilnadu
